VitreousHealth®

The first natural, scientifically proven supplement shown to reduce the symptoms of floaters

www.macuhealth.com

WHAT IS THE VITREOUS?

Between the lens and retina is the vitreous, a clear gel-like substance made up of water, hyaluronic acid and collagen fibers. It needs specific antioxidants to protect it against oxidative stress and disease.

Research shows the vitreous loses these nutrients over time, causing the collagen fibers inside it to clump together. These clumps, called floaters, cast shadows on the retina.²

VitreousHealth is the first evidence-based formula to help manage this irritating condition, offering patients and eye care professionals a safe, natural option to reduce the size and severity of floaters.

Three out of four people will deal with eye floaters at some time in their lives.

THE FIRST AND ONLY SCIENTIFICALLY PROVEN SUPPLEMENT FOR EYE FLOATERS

If floaters interfere with your daily life, you're not alone. In a recent survey, 76% of respondents reported seeing floaters, with a third of them stating that they were moderate to severe.² VitreousHealth's patented blend of nutrients gives the eye what it needs to reduce the severity of floaters.

67% of patients recognized an improvement in their symptoms within six months.¹ The formulation is proven to deliver:

- ✓ 46% decrease in visual discomfort from floaters
- ✓ 47% improvement in daily visual experience
- ✓ 9% improvement in contrast sensitivity

A PROVEN FORMULA

VitreousHealth vs. Placebo Group

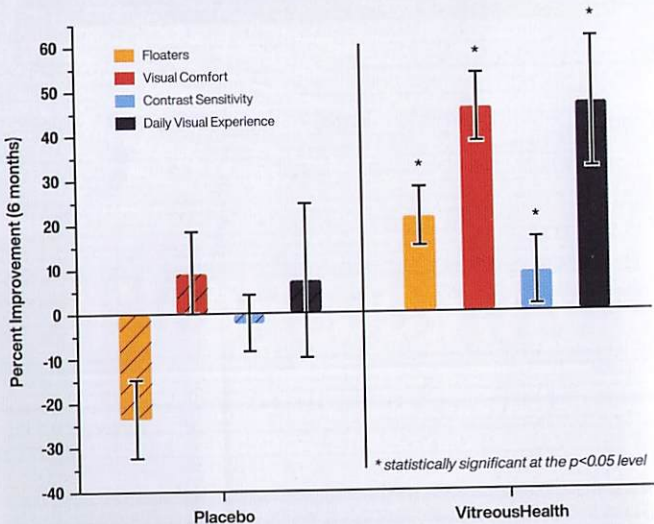

Figure 1

A PROVEN REDUCTION IN VISUAL DISTURBANCES

Vitreous opacity decreased by 70% with supplementation (Active group average decrease of 22%)

Vitreous opacity increased by 52% with no intervention (Placebo group average increase of 24%)

Supplementation resulted in a significant decrease in floater area.

INNOVATION FROM A PROVEN SOURCE

MacuHealth is the brand that eye care professionals have trusted for years. VitreousHealth is based on the antioxidant formulation used in the groundbreaking double-blind, placebo-controlled Floater Intervention Study (FLIES).¹ It's another great product from the leader in eye supplementation.

A SAFE AND EFFECTIVE TREATMENT

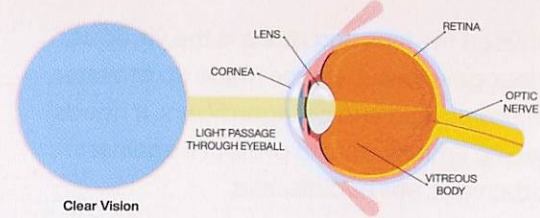

Until now, the only way to alleviate floaters were breaking them up with laser therapy or the surgical removal of the vitreous. These interventions carry the risk of undesired side effects, including retinal detachment and eye damage.

VitreousHealth manages eye floaters by nourishing the vitreous, providing patients a safe and effective alternative to invasive procedures.

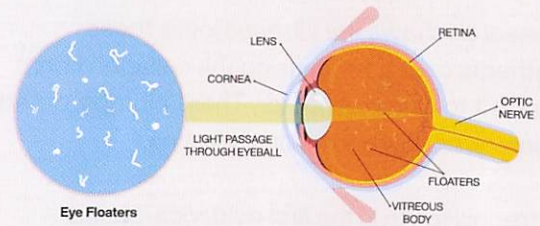

If floaters interfere with your everyday life, you're not alone.
